Strategies for evaluating...

- CRAAP test
 - Currency, Relevance, Authority, Accuracy, Purpose
- Lateral reading/watching
 - “...the act of verifying what you’re reading [or watching] as you’re reading [or watching]... [it] helps you determine an author’s credibility, intent and biases by searching for [sources] on the same topic by other [creators] (to see how they are covering it) and for other [sources] by the [creator] you’re checking on” (New Literacy Project, n.d.)

Strategies for evaluating...

- Streaming and game subscription services
 - CRAAP Test
 - What content is available?
 - Are there trends in monthly subscription costs?
 - What is the cost per use?
- Lateral reading
 - Do these services have overlapping content?

Strategies for evaluating...

- Trailers
 - CRAAP Test
 - Who creates trailers?
 - What are their purpose?
- Lateral reading
 - What does the IMDB or Wikipedia summary say?
 - Does this match what you see in the trailer?

Strategies for evaluating...

- Reviews
 - CRAAP Test
 - Who wrote/created the review?
 - Does the author/creator share *why* they reviewed this media or service?
- Lateral reading
 - Is there consensus across reviews?
 - How did a reviewer rate similar types of media content or services?

Strategies for evaluating...

- Recommendation algorithms
 - CRAAP Test
 - How do they work?
 - What are their purpose?
- Lateral reading
 - How accurate has a specific recommendation algorithm been in the past?
 - Why is something being recommended?

Tactics for picking something from your watch list

- Expand past the trailers and other marketing materials
- Read/watch reviews from more than one person
- If all else fails, maybe just randomly try something!

Activity

Work in groups of 2 or 3 and identify which new-to-them film, show, or game a sample person should watch/play next
